

CSCE 221

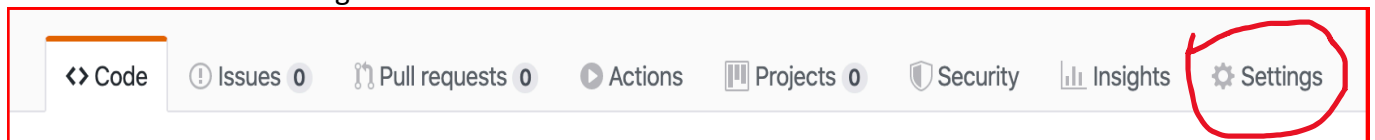

Lab 10

Task 1: Create a Github Account - <https://github.com/>

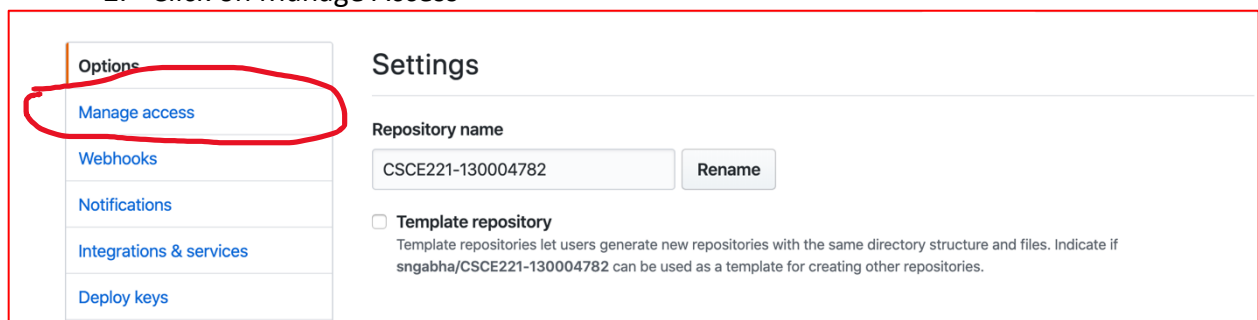

Task 2: Create a private repository with name – CSCE221-UIN and add description of your choice in the description box. Don't initialize your repository with README.

Task 3: Give access to this private repository to “sngabha” and “rizujain”. Follow below steps.

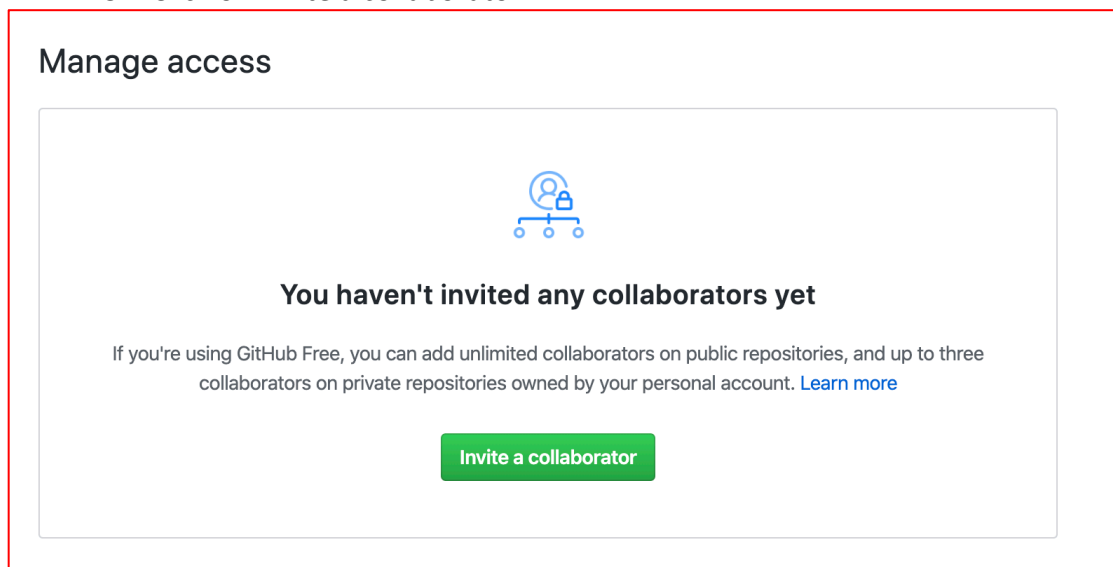

1. Click on Settings

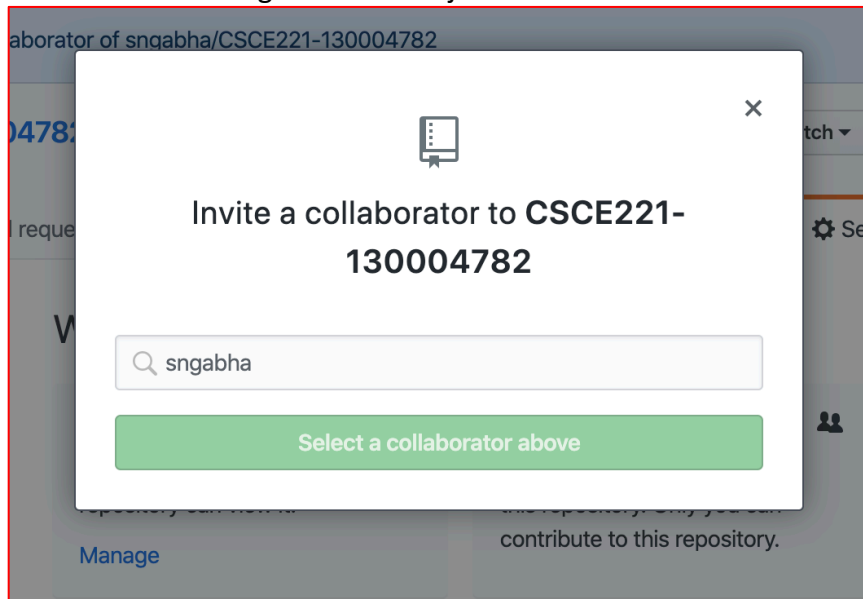

2. Click on Manage Access

3. Click on Invite a collaborator

4. Enter sngabha and rizujain as collaborator.

Task5: Create a directory with same name i.e. CSCE221-UIN in your laptop.

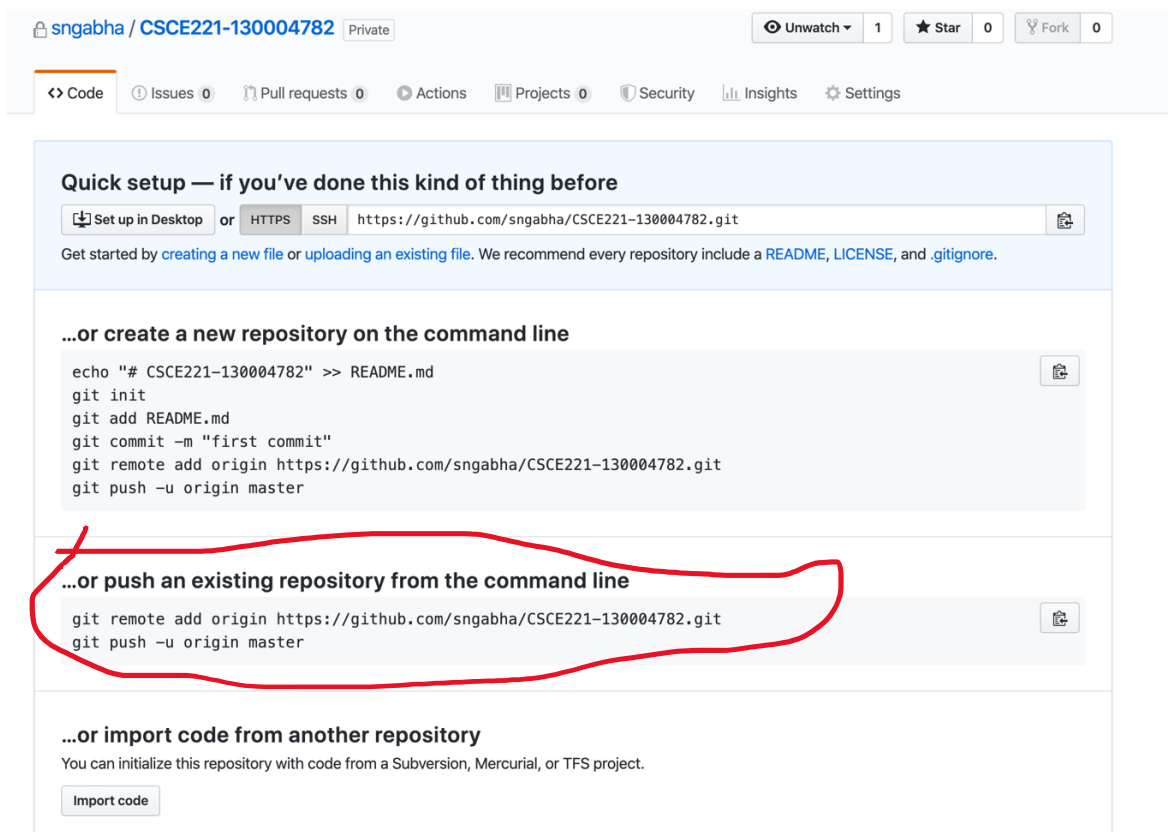

Task6: Move to that directory in your terminal.

Task7: Initialize a git repository by executing command – git init

Task8: Copy Paste the Lab10 folder in your CSCE221-UIN directory

Task9: Add the file and create a commit.

Task10: Link the Github repo with your local repo and do first push using following command mentioned in your github page.

NOTE: Create makefile to execute your program. NO grade if makefile not provided.
